

Pod Point

Pod Point are partnering up with Central UK Vehicle Leasing Limited to bring the future of EV charging to you!

Why Pod Point?

Pod Point are one of the UK's leading providers of electric vehicle charging. Since forming in 2009, they have manufactured and sold over 146,000 charging points across the UK and Norway. They have developed an extensive public network connecting EV drivers with 3,000+ charging bays at locations including Tesco, Lidl and Centre Parcs.

They install smart home charging points for customers of major automotive brands including Audi, Nissan, Volkswagen and Hyundai.

Through their network of home, workplace and public charging points they have already powered over 593 million miles of electric driving in 2021.

Pod Points Mission?

At Pod Point we believe travel shouldn't damage the Earth.

It's this belief that gets us out of bed in the morning and what we're all working towards. We want to look back one day and know we played a fundamental role in the mass adoption of electric vehicles (EVs) - it would be pretty great, wouldn't it? Just imagine... better air quality, less CO2 emissions, global warming a reduced threat.

That's our vision.

So, to make our vision a reality, our mission is to make sure electric vehicle charging is:

1. **Smart**
2. **Available everywhere you park**
3. **Easy to use**

Prices from £899
